

easygoing description

english

Your easygoing tool to go - a fantastic tool/offer for members!

easygoing is: safety, 256 bit encoding, VPN server (OpenVPN), mobility, your own pflogCloud (ownCloud), CallCenter with videoconference circuit, VOIP phone and mail address with end-to end encoding, intranet, internet with wfm navigator (workflow management).

easygoing is a USB-memory tool of 16, 32, or 64 gigabyte having an intuitive work and communication environment, a local file structure, and many other online tools and services which can easily be embedded in the organisational structure of your computer, or a network. An end-user friendly interface enables you to work with any operation system and any browser there is.

For private use, in the media, at work, in companies and by the staff.

With the easygoing stick and the user's package installed on it, you are equipped with a mini-computer you can take with you wherever you go, irrespective of hardwares available. And you improve your private and business organization and activities.

The easygoing stick is an extraordinary tool to enable you to simplify your work and any of your personal activities around the computer without having to change anything in it and with no need to carry heavy technical stuff along. All you need wherever you are in the world is an internet access and a computer or a mobile phone that is equipped with an USB-socket. You simply plug in the easygoing stick and have a go. The best of it: there are no additional expenses. As far as smallness, mobility, and flexibility are concerned, there is nothing that beats the easygoing stick.

...**easygoing**

the uniqueness of easygoing lies in:

the wide range of tools and services, the variety of two very user-friendly front-ends (desktop) to be chosen from (NAVIGATOR + NAVIGATOR Q)
